tjohnston@hcillc.com**HEALTHCARE INSIGHTS Announces Launch of INSIGHTS 5.0***INSIGHTS 5 enhances company product offerings and technology*

Park City, Utah. – March 17, 2008 – Today, at the INSIGHTS User Conference, Healthcare Insights LLC (HCI), the leading provider of financial performance improvement solutions for today's healthcare industry, announced the launch of INSIGHTS 5.0, the newest version of its financial management software, service and support suite. INSIGHTS 5.0 is packed with new features, introduces INSIGHTS® Enterprise Edition™ with Cost and Clinical Reporting and, in 2009, adds Enterprise Financial Planning and Contract Management.

Mary Grace Wilkus, Chief Software Architect for HCI states that INSIGHTS 5.0 is not like any past INSIGHTS upgrade. "In fact, it is not an upgrade to the current INSIGHTS solution. INSIGHTS 5.0 is a wholly new .net system architecture with a dramatic new look, entirely new screen navigation plus many advantages for users.

INSIGHTS 5.0 makes it easy for people to deliver better results faster. We've made it easier to find powerful features by replacing menus and toolbars with the INSIGHTS Ribbon that organizes and presents capabilities in a way that corresponds more directly to how people work. Panels, a new data access and display, are another feature introduced with INSIGHTS 5.0. Panels allow more relevant INSIGHTS information to display on one screen eliminating the need to navigate among multiple screens to complete a specific task."

During the past few months, HCI has signed numerous prestigious clients including Ottawa Regional Hospital and Healthcare Center, St. Francis, Albert Lea Medical Center, Conway Regional Medical Center, and Mercy Memorial Hospital System Center. Each healthcare facility selected HCI's INSIGHTS software, service and support service solution with and its user-friendly format that is easy to use by managers in every department throughout the healthcare facility.

"HCI's expert team understands the issues related to managing a healthcare facility and provides the ability to seamlessly integrate its INSIGHTS technology with existing systems, making them easier to use," said Steven Berger, president of Healthcare Insights. "HCI is dedicated to providing today's healthcare industry with leading financial management solutions."
